ABOUT US

ANCO Rendering Equipment engineers, manufactures and services innovative processing and rendering equipment for the meat rendering, fish processing, food and feed ingredients and environmental industries. For over 115 years we have provided solutions and custom equipment to meet your rendering and processing needs.

DIVERSE EQUIPMENT LINE

Our diverse product line of rendering and batching equipment includes crushers, fat pressers, pumping equipment, processing systems, cookers and waste water treatment systems.

SUPERIOR CUSTOMER SUPPORT

We have over 115 years of expertise on a variety of equipment. Our support team is knowledgeable on all of our products and services to assure our consumers the highest quality support.

QUALITY WORKMANSHIP

ANCO has been providing innovative solutions to the rendering industry since 1902. All ANCO equipment is manufactured in the USA and is built to highest codes in the industry.

EQUIPMENT:

- Bins and Tanks
- Shredders and Grinders
- Cookers and Hydrolyzers
- Dryers
- Separators
- Presses
- Vapor Handling/Odor Control
- Pumps and Conveyors
- Automated Process Control
- Blood Processing Equipment

INDUSTRIES:

- Meat Rendering
- Fish Processing
- Food and Feed Ingredients
- Environmental

CORE PRODUCTS

Our equipment is manufactured in the USA and built to the highest codes in the world. Our equipment utilizes ASME, Lloyd's, and TÜV standards as well as country specific pressure vessel regulations.

◆ BATCH COOKERS

ANCO has more Batch Cookers in operation than any other manufacturer. They require less maintenance with our Pow-R-Pak design and offer automated loading and unloading to reduce labor costs.

◆ SCREW PRESSES

This sophisticated design makes the Screw Press more reliable, versatile, compact and easier to maintain, while delivering high levels of productivity that customers demand. Our PLC controlled operation balances time and pressure to uniformly separate oil from meat products.

◆ STEAM TUBE DRYERS

ANCO Steam Tube Dryers offer double the heat transfer area than other units with the same compact footprint. The Dryer is well suited for all types of free flowing/granular materials such as chemicals, waste and minerals.

◆ HYDROLYZERS

ANCO Hydrolyzers are the preferred choice of renderers worldwide. It offers multiple feeder arrangements for easy integration into existing systems. Our Hydrolyzers raise product quality and protein digestibility due to rapid heating and short residence time inside the chamber.

EQUIPMENT LINE

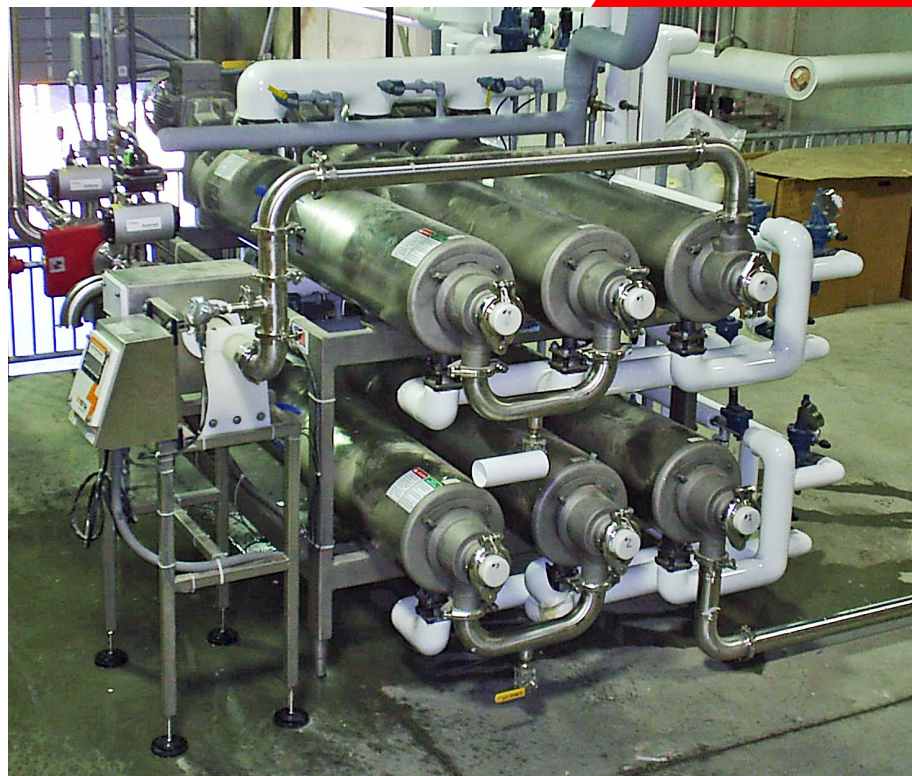

SCRUBBERS

ANCO's 1320 Packed Bed Scrubber is an effective, technological solution to treat offensive odors. Our PLC controls monitor environmental variables, such as heat and humidity and come in single or multiple stage scrubbing systems. ANCO can design and build a packed bed scrubber to meet the strictest air regulations and odor control requirements.

SHREDDERS AND GRINDERS

The ANCO 1045 Crusher is one of the largest pre-breakers in the industry, handling size capabilities of up to 80,000 lbs. per hour without precutting whole animals. The 1045 Crusher has the longest life expectancy of any Crusher in the rendering industry, while remaining cost efficient.

CUSTOM EQUIPMENT

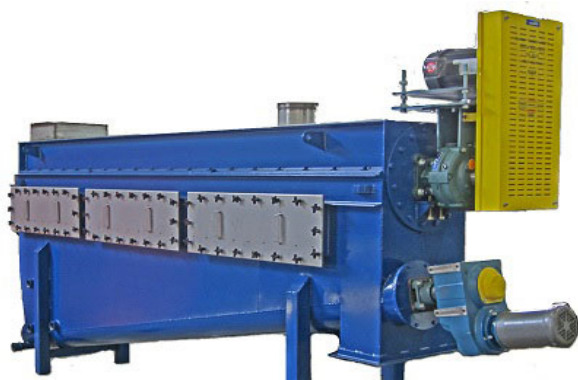

SPECIAL PROCESSES:

ANCO also offers custom manufacturing services such as shafts, pet food systems, plant automation, wastewater treatment, waste grease recycling and food waste processing. Our service and design team have the experience and knowledge to assist with any project.

BINS AND TANKS

Our unique bin and tank solutions can be used to store and process your raw material cleanly and effectively. Each product can be individually tailored to meet your operational requirements.

SEPARATORS

Whether the material is delivered by trucks, screened from a water flume system, or pressed from a processing plant, our separator systems are designed to handle a variety of applications.

VAPOR HANDLING/ODOR CONTROL

ANCO uses a wide range of high quality odor treatment systems for a variety of industries. Our equipment ranges from scrubbers and condensers to cyclones and thermal oxidizers.

LAMELLA PUMPS

ANCO's Lamella Pump has proven to be an excellent solution for meat, fish, poultry, pork, beef and other semi-solid products. This unit also handles a variety of product sizes, from very small to coarse, and includes chunked meat, meat with high bone content, fats, slurries and sludge with high solid content.

PARTS AND SUPPORT

ANCO can rebuild, refurbish, replace and provide equipment/technical assistance on Dupps, Stord or any other rendering manufacturer. ANCO can also provide the service and customer support for all your equipment needs. Our service technicians have the experience and product knowledge to assist with any project.

FIELD SERVICE/SUPPORT

- Site evaluations
- Equipment installation
- Equipment maintenance
- Technical training and supervision
- Plant and equipment appraisals

DESIGN

- Process design
- Plant layout
- Plant feasibility studies
- Equipment design and fabrication
- ASME pressure vessels
- Heat recovery design
- Plant automation
- Systems integration

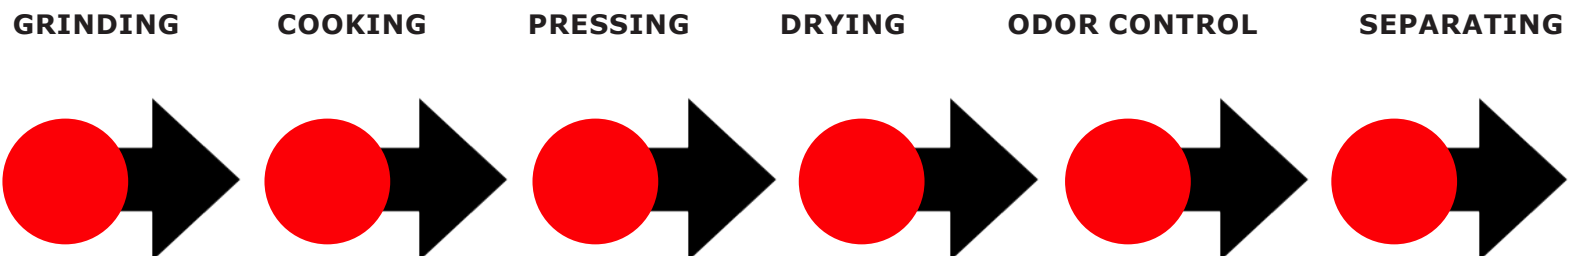

REPAIRS/MAINTENANCE

- Field repairs
- Cooker re-shelling
- ASME code work
- Ultrasonic thickness tests

RENDERING PROCESS

ANCO designs, manufactures and services processing and rendering equipment for a wide range of industries. We understand each industry has its own specific requirements and guidelines and we provide the solutions to meet that need at every stage of your process.
